April 13, 2018

Dear LHS Campus Families and Staff:

In accordance with State Regulations, we are writing to notify you that Pest-End Inc. and Pro-Tech will be spraying pesticide on the Baseball Field, Softball Field, and the turf surrounding the athletic complex at the Lawrence High School Campus. The dates of the applications, weather permitting, are April 20, 27; May 4, 11, 18, 25; June 1; August 17 & October 12, 2018. This pesticide application is part of the routine maintenance for weed control and grubs on the fields as well as the control of the goose population on the fields. The pesticides that will be used are Three-Way Ester II (EPA Registration # 228-317-10404), Dimension 2EW (EPA Registration # 62719-542), Acelepryn (EPA Registration # 352-731), and FlightControl Plus (EPA Registration # 69969-1-67690), all of which is approved for use at school and child care sites. All areas where the pesticide is applied will be marked with colored flags for a 72 hour period following the application. Students, staff, and community members should stay off the fields for a minimum of 2 hours after the application has been performed. As with any chemical, Three-Way Ester II, Dimension 2EW, Acelepryn and FlightControl Plus may cause irritation to eyes, skin, or respiratory tract, if a person comes in direct contact with the chemical during spraying or by touching a sprayed area before the chemical has been absorbed into the ground.

Additional detailed information from the Massachusetts Department of Agricultural Resources and the chemical fact sheet is available on our website, [www.lawrence.k12.ma.us](http://www.lawrence.k12.ma.us). If you have any questions, please contact Timothy Finn, Assistant Headmaster at the LHS Campus at 978-975-2750.

Sincerely,

Michael Fiato,  
Headmaster
